

WHETHER YOU MAKE
LAMP SHADES OR
ROCKET THRUSTERS

Make sure it's

Made In Workshop
Fabrication Studio & Makerspace

WELCOME TO MADE IN WORKSHOP

This is a space for individuals and corporates to make, create and innovate, and then turn what's in their imagination into a reality. Our playground is equipped with every type of tool and machine needed to build, craft and shape.

From the latest computer controlled equipment to hammers and chisels, we've got what you need to go from do to done. And best of all, no one will complain about you making a mess, getting your hands dirty, or your incessant loud banging.

NOTHING ABOUT US IS CONVENTIONAL

We're the first of our kind in South Africa. An open-access workshop with an impressive range of professional equipment and facilities for your innovation, creation and experimentation.

With unlimited coffee and high speed internet access at your disposal, our space offers you the opportunity to work in a collaborative environment where you can bounce ideas off other members, gain inspiration and advice to ensure that you have an enjoyable and rewarding experience.

OUR MEMBERSHIP MODEL ISN'T TRADITIONAL EITHER

Come for a day, stay for a month or even a year. Our affordable daily rates are crafted to fit anyone's pocket. We won't make you pay for a month in advance either. So you'll never lose out on days you paid for, but didn't use.

The **pay per day model** is designed to reduce waste and to ensure you only pay for the days you use. The days purchased don't have to be used consecutively and are valid for a 1 to 12 month period depending on the model plan.

For your convenience, the more days you buy, the cheaper the daily rate. A single day will cost R499 per day, while a set of 30 days will cost R99 per day. We are open from Mondays to Saturdays 8h00 till 17h00 but if you have a pressing deadline, Sundays can be arranged for you.

Model plan	1 Day	10 Days	30 Days	6 Months
Days	1	10	30	180
Total	R499	R2500	R2970	R16 020
Cost per day	R499	R250	R99	R89
Valid for	1 Month	2 Months	4 Months	12 Months

Prices exclude VAT. E&OE.

MULTIPLE USERS

The days you buy belong to you. You can choose to use them, transfer them or gift them to your friends, colleagues or potential customers. If you wish to bring someone with you, or require additional help with that elaborate project, simply transfer some of your days or buy some more.

TRAINING AND CLASSES

Don't know how to use the equipment? No worries. In the time that you have purchased, we can provide you with classes and training on the safe use of all the machinery offered in our workshop. You can choose between one-on-one or group training.

**DON'T MAKE IT ANYWHERE ELSE.

LET'S TALK SHOP

At Made in Workshop we believe in the importance of tools, it was the catalyst that hurtled humanity into modernity. Here is a floor plan of what we have to offer.

The necessities

The section of the workshop containing large power tools enabling you to drill holes, grind, cut and sand.

The CNC section

Our pride and joy area consists of a CNC mill, a CNC router and a CNC plasma cutter.

Our Manual Muscle section

This section consists of our larger manually controlled industrial equipment featuring an industrial lathe and an industrial mill, both with digital readouts.

Drive-in road access

Big project, no problem. Our 4m by 3m roller door access allows you to scale up your project up to whatever your heart desires.

Borrow or buy

Bring your own tools or borrow ours. We also feature a modest essentials shop for buying the components you might have forgotten about.

Keep it together

Our welding section features a handy plasma cutter, spot welder, TIG welder and MIG welder. No need for keeping things together with bubblegum anymore.

Keep your materials safe

A lockable store room is ready to keep your valuable materials and plans safe.

LASER cutting

Everyone loves a LASER, our 150 Watt 1200mm X 900mm cuts and engraves soft materials like acrylic and MDF up to 10mm.

Print Farm

One printer is good, many is better. Our growing 3D print farm will get that prototype out in no-time.

Present it

Make it, and show your client on our 50" LCD TV.

Personal work area

Sometimes you only need a desk with high speed internet access. This is the area where you can sit quietly and work out your all-important plans. Use the quick access computer for saving CNC paths. Browse through the library or grab a beverage to stimulate those neurons.

Socialise

Meet other like-minded folk, bounce some ideas or just draw some inspiration in our lounge area.
